Dear Dr. Lewis,

Good day,

My name is Eric Bernard Tablizo, a third-year Computer Science student at De La Salle Araneta University (DLSAU) in the Philippines. My thesis partner and I are currently conducting our undergraduate thesis entitled:

"Learnlens: A Web-Based Mobile Platform for Automated Test Evaluation at the College of Arts, Sciences, and Technology, De La Salle Araneta University."

As part of our study, we aim to evaluate the usability of our proposed system. In this regard, we would like to respectfully request your permission to use the **Computer System Usability Questionnaire (CSUQ)**, which you developed, as our primary usability evaluation instrument. We believe that the CSUQ provides a reliable and well-established method for assessing system usability.

Please be assured that your work will be properly acknowledged and cited in our thesis. The CSUQ will be used solely for academic purposes and strictly within the scope of our research.

We would be truly grateful for your kind consideration and approval of our request.

Thank you very much for your time and generosity.

May God bless you.

Respectfully yours,
Eric Bernard Tablizo
BS Computer Science
De La Salle Araneta University

You have permission to use any of my published questionnaires including the CSUQ as needed for your research.

James R. (Jim) Lewis, PhD, CHFP
Distinguished UX Researcher, MeasuringU
Co-editor in Chief, Journal of User Experience
Member, Academy of Science, Engineering, and Medicine of Florida
